

Mike Sharples is a professor of learning sciences and chair in educational technology at the Open University in the United Kingdom. He has an international reputation for research in mobile learning and the design of learning technologies. He inaugurated the mLearn conference series and is president of the International Association for Mobile Learning. His current projects include a collaboration with the Open University UK to develop twenty-first century science learning between formal and informal settings. He is author of 160 publications in the areas of interactive systems design, artificial intelligence and educational technology.
